Whistleblower Policy & Scheme

Quantum Foundry uses the whistleblower scheme from the Novo Nordisk Foundation.

The Novo Nordisk Foundation has implemented a whistleblower policy and scheme that enable people to anonymously inform the Quantum Foundry about possible breaches of the Code of Conduct. The Quantum Foundry may impose sanctions for breaches, including a reprimand or a demand that a grant be repaid.

The purpose of the whistleblower policy and scheme is to promote transparency and increase accountability for the behaviour of the Foundry and its collaborators.

The Foundation has entered into an agreement with a law firm to manage the concerns reported under the whistleblower policy and scheme. The nature of the internal process then initiated depends on the nature of the concerns reported.

See the Foundation's and Novo Holdings whistleblower policy and scheme using the URL below.

For security reasons and to ensure anonymity, please type in the web-address in a new tap/window and gain access to the platform.
